SUMMARY OF QUALIFICATIONS

- Computer Science graduate (Bahria University Karachi, June 2026) specializing in AI integration, full-stack web development, and workflow automation.
- Built Almas — an AI voice calling agent for healthcare using Twilio, OpenAI GPT-4, and Next.js, successfully resolving 6/6 emergency test scenarios.
- Experienced in building production-ready tools including SmartPOS, AI voice agents, and stock prediction ML models.

EDUCATION

Bahria University Karachi Campus (BUKC)

BSc. Computer Science | CGPA: 3.0

Karachi, Pakistan

Oct 2022 – June 2026

Relevant Courses: Data Structures & Algorithms, OOP, DBMS, Web Engineering, Machine Learning, Software Quality Assurance, Neural Networks & Fuzzy Logic, Information Security

Cadet College Petaro (CCP)

Pre-Engineering

Grade: 88%

Sindh, Pakistan

May 2016 – June 2021

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript (ES6+), TypeScript, React, Next.js 14, Node.js, Express, HTML/CSS, Tailwind CSS

AI & Automation: OpenAI API (GPT-3.5/4), Claude API, Twilio, n8n Workflows, Prompt Engineering, RAG Pipelines, LangChain

Databases & Tools: MongoDB, MySQL, Supabase, Git/GitHub, REST APIs, WordPress, Vercel, Render

Data Science: Pandas, scikit-learn, Matplotlib, Supervised Machine Learning

E-Commerce & Analytics: Amazon FBA, Keepa, Helium 10, Retail Arbitrage, Product Research

RELEVANT EXPERIENCE

GE Solucions

E-Commerce Listing Intern

Karachi, Pakistan

Oct 2025 – Nov 2025

- Managed and optimized 100+ product listings with bulk uploads, maintaining accuracy and consistency across the store.
- Supported inventory tracking and performance reporting, contributing to improved store efficiency metrics.

Fiverr — Client: MichaelThal.com

WordPress Developer (Freelance)

Remote

Jan 2025 – May 2025

- Designed and developed a fully responsive, SEO-optimized personal website for a professional author using WordPress.
- Delivered project on time with client satisfaction; managed all communication and revisions independently.

Amazon UK

Virtual Assistant — Retail Arbitrage

Remote

Oct 2024 – Jan 2025

- Launched and managed a retail arbitrage operation using Keepa and Helium 10 for product research on Amazon UK.
- Achieved ROI of up to 20%; managed listings, pricing strategies, and inventory tracking end-to-end.

PROJECT EXPERIENCE

Almas — AI-Powered Voice Calling Agent

Final Year Project
2025 – 2026

Stack: *Twilio · OpenAI GPT-4 · Next.js 14 · MongoDB · Tailwind CSS · Node.js*

- Built an end-to-end AI voice agent for healthcare facilities that answers inbound calls 24/7, transcribes speech, and classifies caller intent with no human intervention.
- Implemented dual-layer emergency detection (keyword matching + OpenAI intent classification) — resolved 6/6 emergency test scenarios.
- Developed a real-time admin dashboard displaying call logs, transcriptions, and emergency alert flags.

SmartPOS — Point of Sale Web Application

Academic Project
2024

Stack: *React · Node.js · MySQL*

- Designed and built a smart POS system with real-time billing, inventory management, and product management modules.

Stock Price Prediction App

Academic Project
2024

Stack: *Python · scikit-learn · Pandas · Matplotlib*

- Developed a supervised ML model to forecast stock price trends with real-time data visualization dashboards.

CERTIFICATIONS & TRAINING

- Certified Professional Safety Practitioner (CPSP) — Safety management, risk assessment, fire/electrical safety, emergency response
- Enablers E-Commerce Business Training Program — Amazon FBA, product research, competitive pricing, market analysis
- AutoCAD 2D/3D Design — Complete architectural plan creation including floor plans, elevations, and 3D visualization
